

AmerGlas® Paintstop Green

COMMERCIAL GRADE MEDIA FOR PAINT SPRAYING APPLICATIONS

Features and Benefits

- Economical to use
- Open weave design enhances paint removal from airstream
- Removes overspray of all types of paint lacquer
- Protects exhaust ducts, fans and motors
- Clean exhaust air is discharged to the atmosphere

AmerGlas PaintStop Green media is a commercial grade media designed to remove paint overspray in paintspray cabins.

The filter media is made of continuous filament glass fibres with an open weave pattern that allows particles to penetrate deep into the pad. Additionally the media is equipped with a skin on the air leaving side. Paint is collected throughout the full depth, extending pad life and reducing costs. This exclusive media design eliminates faceloading, increases arrestance and ensures cleaner air.

AmerGlas PaintStop Green media displays excellent resistance to acetone containing solvents. It retains its strength and thickness throughout its natural lifecycle, protecting exhaust ducts, fans and motors from unnecessary dust loading.

Troublefree Installation

AmerGlas PaintStop Green media is green colored on the air inlet side, enabling the media to be installed properly in installations.

AmerGlas® Paintstop Green Media

Technical Data

Type	PaintStop Green		
	2"	3"	4"
Thickness (mm)	2"	3"	4"
Face Velocity (m/s)	1,25	1,75	1,75
Initial Resistance (Pa)	15	40	45
Recommended Final Resistance (Pa)	80	80	80
Airflow per m ² (m ³ /h)	2500 - 6300	2500 - 6300	2500 - 6300
Paint Overspray Arrestance (%)	92	95	98
Temperature Limits (°C)	150	150	150
Media Colour	Green, air inlet side White, air leaving side		

*The degree of separation depends on type of paint, overspray or environmental conditions such as the temperature or pressure in the cabin.

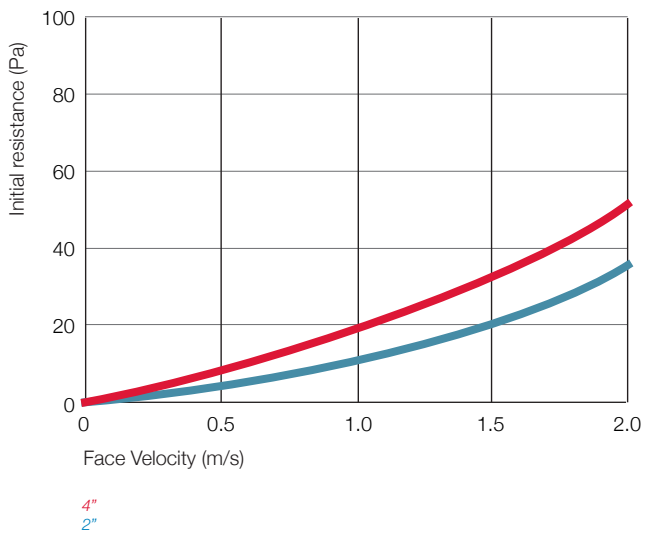

Dimensions for Rolls 2", 3" and 4"*

Width (mm)	Length (m)
500	20, 25, 91*
750	20, 25, 91*
1.000	20, 25, 91*
1.500	20, 25, 91*
2.000	20, 25, 91*

* Standard dimensions only available for 2" and 3" thickness

* Other dimensions upon request
